INTERACTIVE CONTROL

View your cameras from anywhere via your smart device.

KEEP AN EYE ON YOUR PACKAGES

The times are changing and people are ordering more and more items online these days for delivery right to their door. When your package is delivered to your home, you may not be there to receive it immediately. Surveillance cameras, including doorbell cameras, from WH Security can be set up to keep an eye on your porch or entryway 24/7 to help catch potential package thieves in the act.

Our cameras provide another layer of protection for your home. Want to see if and when that package arrived, or who's on your property? You can customize our cameras to send push notifications to your phone or tablet, alerting you any time someone trips the product's motion sensor. With WH Security's automation services, you can view your cameras in real-time.

If you already have a WH Security system, our cameras work with many different systems. They are also a great tool for people with more than one home or cabin that like to check in on their property when they are away. The possibilities are endless! If you like the idea of being able to see what's happening at your property so you can protect what matters most, give us a call at 763.477.3664. We'd be happy to discuss which camera options will meet your individual needs.

DO I NEED TO UPGRADE?

With technology changing all the time, customers often ask us if they need to upgrade their systems. This depends heavily on each individual situation. Systems themselves have not changed a whole lot, but what has changed very much is all the interactive features. Generally, a system that is more than 10 years old may not be compatible with the latest interactive services. And if your system communicates on 3G technology, you will need to upgrade because your system will soon no longer be able to communicate with the monitoring center.

You will need to upgrade if:

- Your system communicates on 3G technology
- You want to get interactive services and have a legacy, non-current system
- Your system is all wired, but you want to add more protection wirelessly
- You disconnect your land line. In this case, you will need to upgrade to a system that connects via cellular or IP communication

To learn more about the available upgrades for your specific system, call our security specialists at 763.477.3664.

24-HOUR MONITORING

24/7 monitoring from our UL Certified monitoring center in Rockford, MN

NEW MEDICAL ALERT FOR ON-THE-GO INDIVIDUALS

WH Security is pleased to announce a new on-the-go medical alert solution designed to protect our clients with the push of a button. This solution is perfect for adults that are not home bound, but occasionally need medical assistance.

This latest medical alert is powered by GPS technology with Wi-fi location services, allowing the client to go almost anywhere and be confident that if they need it, help is just a push of a button away. The GPS technology means that our monitoring center can locate the client in the event of an emergency.

Our on-the-go medical alert includes fall detection, is water resistant and has a four-day battery life. It also features two-way calling so our clients can get the help they need, fast.

Starting at just \$39.95 per month with no-long-term contracts, this medical alert solution allows greater freedom for the active individual. And all our medical alert systems are professionally monitored 24 hours a day, seven days a week. A caregiver smartphone app is also available for an additional \$2.95 per month.

Medical alerts include free in-home installation, service calls and around the clock assistance in any emergency. For more information, call us at (763) 477-3664 or visit our website at wh-security.com/medical.html.

HOLIDAY SIDES

Loaded slow-cooker potatoes

We all need easy sides to complete our holiday meals, and these slow-cooker potatoes are easy to make and are loaded with many favorite baked-potato toppings. Don't have time for the slow cooker? Put everything into a baking dish covered with foil and bake at 350 degrees for 90 minutes or until potatoes are tender. Enjoy!

INDREDIENTS

- Cooking spray
- 2 lb. baby potatoes, halved and quartered if large
- 3 c. shredded Cheddar
- 2 cloves garlic, thinly sliced
- 8 slices bacon, cooked
- 1/4 c. sliced green onions, plus more for garnish
- 1 tbsp. paprika
- Kosher salt
- Freshly ground black pepper
- Sour cream, drizzling

DIRECTIONS

1. Line a slow cooker with foil and spray with cooking spray.
2. Mix the salt, pepper, garlic and paprika into the potatoes
3. Add half the potatoes, 1 1/4 cups cheese, 1/3 of the cooked bacon and half the green onions. Repeat with a second layer.
4. Cover and cook on high until potatoes are tender, 5 to 6 hours. (The bigger your potatoes, the longer they'll need.)
5. About 20 to 30 minutes before serving, top with remaining cheese and bacon.
6. Garnish with more green onions and drizzle with sour cream before serving.
